

# The Standard - Original 1933™ Design Model: CL01A

An icon in its own right! The Standard Collection features the original Coolicon® shade as first produced and a larger companion model. An extensive palette of rich and vibrant colour ensures Coolicon® Standard enhances all settings.

The Original 1933™ Design is a small elegant shade with a curvaceous form and a very human scale. This stunning and versatile hand enamelled pendant shade can be used on its own or in clusters and rows to create statement lighting.

### Important

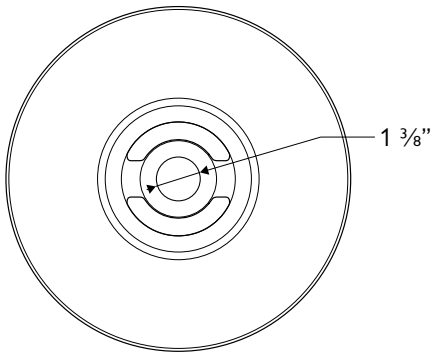

- For indoor use only
- Shade must be secured between lamp holder and shade rings
- Not intended for use in bathrooms, wet areas or installation in Wiring zones 0, 1 or 2
- All power to the circuit must be switched off at supply source before installation
- Installation to be carried out by a competent professional in accordance with relevant and current building regulations and codes
- Electric cord and connection terminals must be relieved from strain with suitable cord grip and strain relief product
- Ensure luminaire electric cord is 3x18 AWG size and double insulated, see mounting type below
- Always consider the total weight load when installing and suspending your Coolicon™ shade, ensuring sufficient structural support
- Maintain safe distance between luminaire and surfaces

## Weight

Due to the handmade nature of the product, weight may vary.

Approximate shade weight: 1.1lb

Approximate pendant weight: 1.2lb

---

## Handmade Process | Materials

Handmade in England

Material: Steel

Finish: Vitreous Enamel

Indoor use only

Steel: infinitely recyclable

---

## Maintenance | Care

Do not use any abrasive cleaning products.

Vitreous Enamel is smooth and impervious which makes cleaning your lampshade easy.

We recommend you dust your 1933™ Design lampshade with a dry, soft cloth. Stubborn, greasy marks can be removed gently with a soft cloth dampened in lukewarm water with a mild detergent.

Cleaning of the lampshade should only occur when the light is switched off with no power to the circuit. It is important that the electrical fitting is not exposed to any liquids.

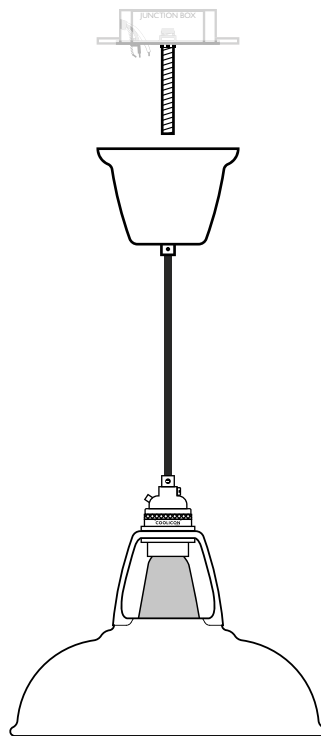

## Mounting Indications

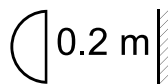

Suited for assembly with 4" Junction Box (octagonal or round)  
The example shows assembly instructions for  
Coolicon Brass Suspension Set - Model: SK03-E26-BRS (included)

Must be able to support a minimum additional weight load of 5.5lb.

For more details, see separate Suspension Set Instructions
