Dimensions for Bouquet series

The braids are hand-braided, therefore there will be slight variations in the braid and the length of the braid. Including guide lengths.

The larger the model shade, the longer the braid. But within each size shade, the shades take up more space when there is more shades in the cluster. And therefore the braided piece will be a little shorter, to keep approx. the same overall length.

Since the shades can be moved around during assembly and thus positioned differently, the measurements here are also only indicative.
