The designer trio Harrit-Sørensen + Samson were clearly inspired by nature's very own snowdrop flower and came up with this fantastic interpretation for a lamp series.

This is an incredible display of how craftsmanship traditions can be transformed into a modern design expression.

Hang-up with steel detail and white textile cord (4meters) are included in the package. Included with model 120L and XL is also a opale cover for the bottom of the lamp.

Every shade is hand folded in Odense, Denmark. This means that every product is unique and must be treated carefully to avoid breakage. Therefore you should always follow the instruction when handling a shade from LE KLINT.
