

# AERITAGE

## Line Card

---

Aeritage is a new kind of lighting agency – one built for the forward-thinking designer, architect, and builder. We believe lighting shouldn't be an afterthought in sustainable design. That's why we've created a hybrid model that reimagines how you discover, specify, and source lighting solutions – with sustainability, wellness, and aesthetics at the core.

**Æ** With powerful filters and smart tools that let you search by sustainability and wellness features, alongside traditional fixture specs, we make it easier to source lighting that supports People & Planet.
